

3T MR Imaging in the 1000 Islands

Queen's University, Kingston, Canada

1st Annual 3T MRI Anatomy and Pathology Symposium
October 4-5, 2019

Four Points Sheraton Hotel, Kingston, Ontario, Canada

Welcome!

This program is a practical 3T MRI anatomy and pathology course. We aim to highlight current trends and recent advances in 3T MR imaging in various body parts through didactic and interactive case-based sessions.

Target Audience

The content of this program is developed for radiologists, radiology residents and fellows. This program is designed via input from the various experts in their respective fields in Radiology at Queen's University. The program is tailored towards enhancing anatomical skills, highlighting advances in clinical imaging techniques, and providing guidance to develop focused differential diagnoses and management suggestions.

Conference Co-Chairs

Dr. Eric Sauerbrei, MD FRCP, Professor of Radiology, Kingston Health Sciences Centre, Queen's University
Dr. Donatella Tampieri, MD, Professor of Radiology, Kingston Health Sciences Centre, Queen's University

Program Highlights

Our first annual program will feature an in-depth focus on:

- Radiologic Anatomy
- Abdominal and Pelvic Imaging
- Neuroradiology, including Perfusion Imaging of Brain Tumours
- Musculoskeletal Imaging of Small Body Parts
- Cardiac MRI
- Prostate MRI

Guest Speaker

-----, MD FRCP.
Head, Department of
